

Itty Bitty Playdough Butterflies!

1. Start with 4 little balls of play dough.
2. Make 1 end of each ball pointy, then flatten the other end.

3. Make 4 wings and one body that looks like a little caterpillar.

4. Use the end of a pencil, chopstick, or a small dowel to gently push the wings onto the body.

5. Give the whole butterfly a gentle little pinch to push the wings up.

If you are going to put the butterflies on a branch let them dry a bit (probably overnight). When the butterflies are dry enough to handle, get a grown up to use a glue gun to attach each butterfly to the branch.
